Summary

Python Developer with 5 years of experience building scalable backend services at Stripe and Twilio. Specialized in FastAPI, Django, and event-driven architectures on AWS. Reduced checkout API p95 latency by 52ms serving 120M+ transactions/year. AWS Certified Developer – Associate.

Skills

Python	•	FastAPI	•	Django	•	Celery	•	Redis
PostgreSQL	•	AWS Lambda	•	Docker	•	Kubernetes	•	pytest
SQLAlchemy	•	Apache Kafka						

Experience

Python Developer	Mar 2022 - Present
Stripe	San Francisco, CA

Developed and maintained FastAPI microservices for Stripe's payment processing infrastructure handling billions in annual transaction volume.

- Built FastAPI microservices processing 120M+ payment transactions/year with 99.99% availability SLA
- Reduced checkout API p95 latency from 180ms to 128ms through async refactoring and Redis caching
- Built real-time webhook delivery system processing 8M events/day with 100ms median latency
- Led Python 3.9 → 3.12 migration across 14 services, eliminating 23 security vulnerabilities

Python Developer	Jul 2020 - Feb 2022
Twilio	San Francisco, CA

Built Django REST APIs and Celery async job systems for SMS/voice campaign management serving 4,000+ business customers.

- Built Django REST APIs for SMS/voice campaign management serving 4,000+ business customers
- Optimized Celery task queue reducing async job processing time by 61% (from 8.2s to 3.2s)
- Implemented end-to-end payload encryption achieving SOC 2 Type II compliance
- Mentored 2 junior developers; both promoted to mid-level within 12 months

Education

Bachelor of Science	Sep 2016 - May 2020
UC Berkeley	Berkeley, CA
Software Engineering	GPA: 3.8
